

iMediaLogger Dashboard

The iMediaLogger Dashboard is an application that can be installed onto any Windows 10 or 11 PC including the Logger workstation. It provides several useful features that provide quick access to one or several Logger workstations.

Key Logger Dashboard features:

- Quick Links for Win-OMT Support, User Guides and Videos
- Graphic links for short description of commonly used features
- Installed and current version check for the Logger Suite
- Support Tools for common Windows OS functions and features
- A side panel that allows several different info tabs for multiple Loggers
- The ability to archive or print multiple Logger configurations
- A configuration section that provides multi Logger access, online testing and main page features
